Fake It

Candypants

I always heard that boys would dip into anything that had a face
Devotion goes only as far as they can reach below the waist
But then you say you would never treat me that way
You care about me too much to indulge without love
But I say

Fake it
Close your eyes and fake it
Love me with a smile
Kid me all the while
Come on, just take it

It's true there are some boys with feelings of tenderness to spare
But a perfect crush loses its luster and suddenly no one's there
That's why I say that it doesn't matter any old way
You can put aside those good intentions for my happiness and

Don't worry, I don't adore you- you mean nothing to me
I'm only asking for a little time and conjugality
So don't you say you could never see me that way
You can put me on
I want you to
