

The Motion Makes Me Last

Eluvium

How does the motion make me last?
I shuffle forward and I'm back
I can be questioning my thoughts
but not looking for what I lack
what is it that has my mind so hypnotized?
shapes are for looking at
and their colours create my mood
I'm a vessel between two places I've never been

To sink further and reform design
creation as a pathogen
what's more than subtle in these (heights?)
I know you're looking forward to them
what is it that has my mind so hypnotized?
Evolving on a thought that you've half realized
life is real only then when I am but I am I am surprised
shapes are for looking at
and their colours create my mood
I'm a vessel between two places I've never been
