

# Restless

## Too Close To Touch

Oh, I'm stressing, rattling my brain for a feeling that's missing  
Oh, I question everything that's taking a weight on my chest  
But now undone, giving into the things they want  
I'm done with doubt, enough, shutting out all the noise  
And all their distractions, noAll I know, I'm outta my head, outta my mind  
Doing the whatever makes us lose control just for a night  
Try to do the city lights(2)  
Look inside for what you think, either way, you'll break it free  
Who needs sleep when we're the one we all feed  
I'm thinkin' lately it's been hard to see  
Under pressure, I'm on the edge, let it take control  
shutting out all the noise and all their distractions

(Interlude)

Dangerous, stay stay out of reach  
Feel the earth beneath our feet  
Chasing things we cannot see  
Nothing's ever what it seems

(Bridge x2)

Searching for another way  
Truth is hard to find these days  
Chasing things we cannot see  
Nothing's ever what it seems
