

Betterlove

[Lewis Taylor](#)

Honey we just found a place in time
No doubts in our minds
Where nothing's ever as it seems
There's no need to be afraid through the love that we made
We're living in a world of dreams
They say it's hard for the man to let it all go
But when we're getting down on a thing you and I know
Whatever we try gonna take us somewhere
You take control baby I don't care
I'll just surrender when pushing come to shove
We keep on making better love
Don't believe a thing when lovers say
We've tried every way
They ought to look at you and me
For whenever you take your turn
You teach me and I learn
About the way a man should be
Gotta take a hold of yourself and swallow your pride
'Cos every fella has what they call a feelin' inside
You gotta get on with that side of yourself
Or you ain't able to love nobody else
I said baby I know just what you're thinking of
And that's why we keep on making better love
I believe the love and how we make it
Gonna last forever more
Lovin' you feels so fine
Girl we've been gettin' down this evening like we never did before
