

Infectious

Lagwagon

Controlled, consumed
Thoughts unattached
Each one a failed synapses detached from fact
One positive, one negative
Desperate, holding on to healthy imagesRemember
witness, wattness, matters
we're not gonna make it
Provoking everyone but no one gives a...Half laugh, half sigh
Half-sad, half-smile
Losing ability to recall his half-life
Burn from the stove
Keys locked inside
Dazed as impending anger turns up in repriseRemember
green light, keeper, easy and eyes on the road ahead
Provoking everyone with all the words he saidInfectiousI won't speak of all that would have been
Gained, lost, spent
But I won't think of all that could have beenControlled, consumed
Thoughts unattached
Outburst, these images are melding in my headRemember
Franken, Milkweg, Lintfabrik
The weirdest we have seen
Fires and blown-out tires
Perfect tragedyInfectious
InfectiousBut I won't think of all that should have been
Waste, lost, spent
But I won't think of all that could have beenGoodbye old friend
I won't speak of all that could have been
Goodbye old friend
I won't speak of all that could have been
Goodbye old friend
