Infectious

Lagwagon

Controlled, consumed

Thoughts unattached

Each one a failed synapses detached from fact

One positive, one negative

Desperate, holding on to healthy imagesRemember

witness, wattness, matters

we're not gonna make it

Provoking everyone but no one gives a...Half laugh, half sigh

Half-sad, half-smile

Losing ability to recall his half-life

Burn from the stove

Keys locked inside

Dazed as impending anger turns up in repriseRemember

green light, keeper, easy and eyes on the road ahead

Provoking everyone with all the words he saidInfectiousI won't speak of all that would have been

Gained, lost, spent

But I won't think of all that could have beenControlled, consumed

Thoughts unattached

Outburst, these images are melding in my headRemember

Franken, Milkweg, Lintfabrik

The weirdest we have seen

Fires and blown-out tires

Perfect tragedyInfectious

InfectiousBut I won't think of all that should have been

Waste, lost, spent

But I won't think of all that could have beenGoodbye old friend

I won't speak of all that could have been

Goodbye old friend

I won't speak of all that could have been

Goodbye old friend
