

# If We Could Remember

Yolanda Adams

If we could remember  
The moment of our birth  
We give our voice to songs and whispers  
And know what life is worth Remember, remember Suddenly there's beauty  
In peace there's all the past  
And sorrow clings to angry questions  
The days of dust at last And morning holds us  
When the worlds come tumbling down  
A dance of ghosts and ragged dreams  
Spinning 'round, spinning 'round, spinning 'round I remember  
Remember, remember  
Remember, remember If we could remember the power of the light  
That cripple prayers are sometimes answered  
And hope survives the night  
And hope survives the night, the night I remember, I remember  
Remember, remember  
Remember
