

# Slow Rivers

## Elton John & Cliff Richard

The weather man he looks confused  
Shakes his fist at the sky like you used to do  
But you don't remember things like that do you?  
The balance was uneven but I'm breaking throughSlow rivers run cold  
Shallow waters never sank so low  
I thought I'd drown and you'd never know  
You're a slow river and you run so coldThe winter here don't believe in God  
The bitter wind just bites through me like a wild dog  
I still see your eyes tonight like headlights through the fog  
But one foot in your door oh that's all I ever got  
Slow rivers run cold  
Shallow waters never sank so low  
I thought I'd drown and you'd never know  
You're a slow river and you run so coldChances are you'll reappear  
Swim my way in a flood of tears  
No place to hide your conscience so  
You're a sinking ship with no place to goSlow rivers run cold  
Shallow waters never sank so low  
I thought I'd drown and you'd never know  
You're a slow river and you run so cold  
And slow rivers running cold  
Slow rivers running shallow waters never sank so low  
I thought I'd drown and you'd never know  
You're a slow river and you run so cold
