

Some Children

Holy Ghost!

You're the focus
? the moment
Act like you own it, that's for sure And you complainer
Big entertainer
Don't need to listen anymore And I should move along
Back up and move along
Just write a note and Just grab my keys and coat
I know just what you'll see
It's just another miscommunication You don't hear when
I'm talking
You don't hear when
I'm singing Under the big light
You're the purpose
Woo the show from time to time See the child
Stop and smile
People gathering around And I should walk away
Back up and walk away
But then I stop and stay It's like a car crash
When the radio's still on
Long after moving You don't hear when
I'm talking
You don't hear when
I'm singing You don't hear when
I'm talking
You don't hear when
I'm singing You don't hear when
I'm talking
You don't hear when
I'm singing Just when people thought
You couldn't get enough
You got some more
That's what makes you different
From them, from them all
And that's for sure
