

# Heaven Bound

[Kelly Willis](#)

Electricity roared but you looked so bored on the line  
Nobody knows how it felt to see that cannonball melt in your mind  
Calling all cars, one less dog behind bars, one less man in pain  
It hurts to see you go but darling don't you know we're so glad you came You'll stay gone a long, long time  
Day by day you'll fly across our minds  
Only a fool would want to stick around  
When heaven bound Disconnect the phone, heart from bone, voice from mind  
So sad and blue, how'd you do, of course you did just fine  
Grab a tail on this big gray whale and do your best to stay brave  
In that final hour he's just a beautiful flower that couldn't be saved You'll stay gone a long, long time  
Day by day you'll fly across our minds  
Only a fool would want to stick around  
When heaven bound
