When Hearts Collide

Poco

I don't want to scold you
I just want to hold you
Keep you in my arms all night
I can't understand why
It's so hard for you and I
To make these feelings come out rightTake it easy baby, take it slow
Because it's true you knowWhen hearts collide
Love can't survive
It goes to pieces before your eyes
When hearts collideCan we find our way back
Can we find the right track
Before it gets too late for us
We had something special
Something we can't let go
Or all we'll have is loneliness
