When You Know You Know

Natasha Bedingfield

You taught me a lesson about love today
Love is not a castle in the clouds
'Coz when there's a storm it'll all come crashing down
I gotta find it like a penny on the ground
'Coz that's something I can keep and carry around
Truth is not a feather blowin' 'round in the wind
It's that jump in your heart, goosebumps on your skin
Just pinch me if it's really happening
'Coz I'm more awake than I've ever been
And you're the one from my dream
You're out of my mind and into my heart
In more than a feeling, more than I could have thought
I can't deny, I can't say love never comes
All I know is when you know you know
And I just know
That love has come in the form of you
If someone put me on a witness stand
I'd point to you as hardcore evidence
Your proof that you don't have to understand
You can still fall into the right hands
You're the one in my dreams
You're out of my mind and into my heart
In more than a feeling, more than I could have thought
I can't deny, I can't say love never comes
All I know is, when you know you know
And I just know
That love has come in the form of you
I was a doubter
A typical won't believe 'til I see
Oh, so grounded to think that someone like you
Couldn't be right in front of me
You're out of my mind and into my heart
In more than a feeling, more than I could have thought
I can't deny, I can't say love never comes
All I know is, when you know you know
And I just know
That love has come in the form of you
You're out of my mind and into my heart
In more than a feeling, more than I could have thought

I can't deny, I can't say love never comes
All I know is, when you know you know
And I just know
That love has come in the form of you
And I just know
