

Beautiful Secrets

[Sarah Blasko](#)

Beautiful secrets, you guard them in your secret garden
You water and nurture them until they're bigger than life itself But you can't always know what they will
uncover on the news
And you can't be too sure that your secret life won't show through Beautiful speeches, the lines that are
preached here are only half-truth
Delicious like murder, one step and you're further than you could admit But you can't always know what they
will uncover on the news
And you can't be too sure that your secret life won't show through
'Cuz you can't always know what they will uncover on the news
