Every Time You Touch Me (I Get High)

Charlie Rich

Every time you touch me I get high
And every time you're near me I can fly
High above the clouds and rain
Way above the hurt and painAnd when you're gone I fall down from the sky
But every time you touch me I get highI've been touched by the angels
And I've been kissed by the very best
And I've been loved hard by quite a few
But after you I forget the rest'Cause every time you touch me I get high
And every time you're near me I can fly
When your fingers touch my skin
That's when I start to live again'Cause without your love, I'd lay right down and die
Every time you touch me I get high
