Sweet Payne

The Hold Steady

Payne Avenue lives up to its name Some nights it's painful and strange The whole city seemed sane in the day But some nights it seems distressed and derangedThe east side is where we met with those guys That said they'd get us high but then changed Now they're down in the basement And they're bashing out his brains Kids are getting cut up with the motorcycle chainsAnd St. Paul had it all when we called And they were maxing out on medicine A shaved head and the blood on the bed And those guys you recognize, they got the same tattoos as GideonStrong stuff and she had more than enough And she was slumping over smiling and sailing off with cherubim The cityscape skins are kinda kicking it again They're gonna show these kids some disciplineGideon's been living up in Bay City, Michigan And he's been workng at the Michelin He got messed up with some messed up magiciansWe got so high some nights Michigan looked just like a mitten Some nights we got fried Strung out on residuals and visuals and laser shows Reach into the speaker and try to hold on to the quarter notesI always dream about a unified scene I always dream about a unified scene There's James King and King James and James Dean At a table in the corner of my unified sceneThey want a double order of love and respect They said they just got back from up in Hostile, Massachussetts And girl, I've seen your friend, she looks nothing like Jada Pinkett I think you got something in those cigarettesGideon was living up in South Minneapolis He was the cowboy on the crosstown bus And all the little phillies at the Yukon Club Are gunning for the goldrushWe got tangled in electrical fences We got wrapped up in the indian fringes All the little phillies at the Yukon Club Are gunning for the goldrush Yeah, they just can't get enough
