

# Welcome

## Denali

I have my own beam light  
An apparition, a sensation is no guide  
    And on my way to see  
    Something caught my eye  
    The light inside is on  
    Watch your step  
    Take a breath if you come in  
    Did I invite you in  
    Most impressions fade  
    But you're still standing  
    There is no landing for now  
    A watchful eye can see right in  
Will it be innocence or just a daydream that dies  
    How did you get so close to being in here  
    Did I invite you in again
