Burn

Stellar Road

first question
can you fly away from dreams at night?
can you come to grips with what you feel inside?
my mind is dimming my mind is blind
to my thoughts
just let it ride let ride

don`t burn away
save your better self for your better days
and don`t waste your time
and all of my love for you
god damn look away
take `em where the wind blows
take `em where the wind blows you down
take `em where the wind blows

second question
what do you know about your soul?
i saw you empty it out just to shake off the cold
your life is dimming your life you can`t find
but your head tells you to let it ride let it ride

last question
what do you know your soul is cold
i finally took you out i finally took my toll on you
the plague is eating as it multiplies
but you insist just let it ride let it ride
