Make It Back

Lesley Roy

I was blinded by you I got lost in your eyes too afraid to find you And too late to read the signs To read the signsI was young and foolish Didn't know how to love Now I see the truth in All that's left undoneNow I know that I need you Only hope is just to see you Scream your name through the silence See your face in the distance 'Cause I'm crawling and falling Whatever I must do to make it back to youFeel you with me always In everything I do Now a day is dawning We can make it through Cause I know that I need you Only hope is just to see you Scream your name through the silence See your face in the distance 'Cause I'm crawling and falling Whatever I must do to make it backPraying for a second try to be in your arms Now that I have realized just who we are You're the one who makes me feel aliveNow I know that I need you Only hope is just to see you'Cause I know that I need you Only hope is just to see you Scream your name through the silence See your face in the distanceNow I know that I need you Only hope is just to see you Scream your name through the silence See your face in the distance 'Cause I'm crawling and falling
