We're Sleeping

Down to Earth Approach

You are young
We watch ourselves grow older every day
We all know what we want
Thinking back all the times
You never thought much anything
And I don't care that it's over
We sleep but we're better off awake
Just say when, and I will listen, always x2
Keep your eyes on the road, and keep your head to the ground
Cause we're a quarter dead already
And already I'm tired
Thinking back all the times
You never thought much anything
And I don't care that it's over
We sleep in but we're better off awake
Just say when, and I will listen always..
Always x3
We sleep in but we're better off awake
Just say when, and I will listen always x4
