External

Waltari

EXTERNAL
I - I'll leave the city for a while U - I'll be gone when you wake up I'm livin' and dying outside the principle I'm crawling and flying I am like too flexible She?- I'm always gonna miss you He- disagreement didn't stand in our way I'll be following my rules outside the principle I'm bitter like salt maybe I'm radical
I'm and external case I just wanna leave this place I can't deal with you if you can't hear my voice An external choice I was made of silent noise I'm external till you wake me up! (again)
We- there is no more identity You- you better give us a clue to ...why we're livin' and dying outside the principle why these global minds can't bend and be flexible
