## Guttermouth

Advisory - the following lyrics contain explicit language:

it's friday night, I've got a date  
with this vegan girl Katee  
you know I really like her style  
smile, style  
oh, I love you, Kate  
but you've gone too far  
you won't even sit in my brand new car  
it's got reclining bucket seats  
and a cd player, so what's your fucking beef?  
is it my cozy leather seats?  
is it the covers made from sheep?  
ok, I guess that we can walk, and walk, and walk  
what kind of guy do you think I am?  
you only take off your shoes when you're in Japan  
I bought this outfit just for you  
so what if they're suede?  
and now my jacket too  
so what am I supposed to do?  
I'll freeze to death and catch the flu  
ok, I'll do it just for you  
we made it out and we had an ok time  
I caught pneumonia and a mild case of frostbite  
she said I'm sorry, Mark. I hope that you pull through  
next time we go out please just wear some different shoes  
I tried to fuck her and you know what happened then  
she said that condom you've got's made from a lamb's skin  
so what's your problem?  
last friday night, you know I had a date  
it was with this vegan girl  
I think her name was Kate  
if you're lookin for some action, or if you wanna score  
just eat some bark and acorns

and she will like you more than me!
