City Lights (Days Go By)

[Bob Mould](#)

Days go by
I wait to see the city lights
Clear view sky
I've got to make the most of thisI rewind the interstate
In my distant memory
Hateful logical
Cloudy calm and everythingTake the wheel
There's got to be an exit somewhere
The less I feel
The more I like the way you treat meI respond to everything
Whispering into my eyes
So illogical
Cloudy calm and everythingI want you near me but I
Need the space for contemplation
I want you dearly but I
Need to find the city lightsDriving away from you
Someday I'll be back to find you
I hope you understand
I need to find my city lights
