

# Still My Dream

## Big Deal

[Verse 1]

All the junk that keeps you so distant  
I can hardly see you through  
This stuff that takes you so far from  
What you want and what you do  
Oh, your name  
Ringing in my ears  
But it never sounds the same  
Under the moon you reflected

All the words we couldn't say [Chorus]

I shut them out to see your face  
But somethings always in the way  
But you are still my dream

Oh, you are still my dream [Verse 2]

Does it feel just like you remember

Does the magic still remain?

The wind is changing direction

And the music dies again [Chorus]

I shut them out to see your face  
But somethings always in the way

You are still my dream

Oh, you are still my dream

I shut them out to see your face

But somethings always in the way

You are still my dream

Oh, you are still my dream

You are still my dream

Oh, you are still my dream

You are still my dream

Oh, you are still my dream

You are still my dream

Oh, you are still my dream
