

Hearts Without Chains

[Ellie Goulding](#)

You wake up and you know it's time to go
With spending heads I lie on what you smoke
Chase the hands on my watch, can hold you close
This misery is weightless as a stone. Have you lost the scendings I have lost?
Do you know that panic I know?
Would I see the terror in your eyes
Did you know that fever I know?
I wish time was still,
We'd stay right here
With time to keep in our hearts without chains. And if time was still
We'd have no fear, or scars to heal
In our hearts without chains
In our hearts without chains You left everything behind except yourself
All I see is question marks and nothing else
You must have landed in New York by now
Please don't bring this love down And have you lost the same things I have lost?
Do you know the panic I know?
And would I see the terror in your face
Do you know the fever I know? I wish time was still
We'd stay right here
With time to kill
In our hearts without chains
And if time was still
We'd have no fear, or scars to heal
In our hearts without chains
In our hearts without chains Don't bring this love down
Don't bring this love down
Don't bring this love down
Don't bring this love down And if time was still
We'd stay right here
With time to kill
In our hearts without chains And if time was still
We'd have no fear, or scars to heal
In our hearts without chains
In our hearts without chains
In our hearts without chains
