

Never Be A Star

Halloween

No matter how big we are
We dream of home
The place where we all belong
Therefore this song We are who we are
We'll never be a star
We are where we are
But we'll never be a star No time to see all our friends
There where we are
Ten thousand miles are quite long
And much too far We are who we are
We'll never be a star
We are where we are
But we'll never be a star
A star, a star, a star, no We are who we are
We are who we are
We are who we are
We are who we are We are who we are
Never be a star
We are who we are
Never be a star We are who we are
We'll never be a star
We are where we are
But we'll never be, never be We are who we are
We'll never be a star
We are where we are
But we'll never be a star We are who we are
We'll never be a star
We are where we are
But we'll never be, never be We are who we are
We'll never be a star
We are where we are
But we'll never be a star We are who we are
We'll never be a star
We are where we are
But we'll never be a star
