

One Love

Makeshift Innocence

Start to breathe
Heavens got a place
For both you and me to go
Choose to be
The change you wish
That you could see And you can't fail
We will all be there
To help you out
All you got to do
Is shout out
One love Every day all you really got to say
Is you got one love
And in the sun when you sit and watch the waves
You got one love
Like Marley, yeah Bob Marley used to sing it
You got one love
And I know that everything will be irie
When you got one love What you need
Is different from the things that you got you see
And what you got
Will own your life and leave you lost
And yes we can change
Its never too late to drop the hate
All you got to do is shout out
One love Every day all you really got to say
Is you got one love
And in the sun when you sit and watch the waves
You got one love
Like Marley, yeah Bob Marley used to sing it
You got one love
And I know that everything will be irie
When you got one love
And I know that everything will be irie
When you got one love Yeah you got it, yeah you really really got it
You got one love
I think you got it, yeah you really really got it
You got one love You got one love
You got one love
