

# You Don't Get Lucky

## Thompson Square

You transferred in from out of state  
First day of class, eleventh grade  
And I got picked to show you around the school  
You come to find out that you moved in  
Just down the road from where I live  
And girl I gotta tell you that was cool Remember that night your battery died  
And I just happened to be driving by  
I never go that way on my way home  
We can try to make it all make sense  
And say it's all just coincidence  
Call it luck but I don't think so Somebody up there must be on our side  
You don't get lucky that many times  
There's only so many spots on a dice  
You don't get lucky that many times These people think this world of ours  
Just one day showed up next to Mars  
Without a speck of help from up above  
What are the odds in a million years  
That one day we both wind up here and  
We fit together like a glove Somebody up there must be on our side  
You don't get lucky that many times  
There's only so many spots on a dice  
You don't get lucky that many times  
Yeah Somebody up there must be on our side  
You don't get lucky that many times  
We must be doing something right  
You don't get lucky that many times You don't get lucky, you don't get lucky  
You don't get lucky that many times Whoa oh oh, whoa oh oh  
You don't get lucky that many times  
Whoa oh oh, whoa oh oh  
You don't get lucky that many times
