Something Inside Of Me

The Coral

Something inside of me
Feels like I've been wanting you forever
There'll never be another century
There's no time to think about the weatherWhen there's something inside of me
Something inside of me
Something inside of me
And now I can't look backThe invisible invasion
It's like a stranger strangled on the moor
Into the void for now I'm gone
Five in the morning I'll be knocking at your doorWith something inside of me
Something inside of me
Something inside of me
And now I can't look backOh, please don't cut me loose
I know you think that I'm bullet-proof
Can't you see that it's hurting me
What do think I'm supposed to beWhen something inside of me
Feels like I've been wanting you forever
There'll never be another century
There's no time to think about the weatherWhen there's something inside of me
Something inside of me
Something inside of me
And now I can't look back
