

# Something Inside Of Me

## The Coral

Something inside of me  
Feels like I've been wanting you forever  
There'll never be another century  
There's no time to think about the weather When there's something inside of me  
Something inside of me  
Something inside of me  
And now I can't look back The invisible invasion  
It's like a stranger strangled on the moor  
Into the void for now I'm gone  
Five in the morning I'll be knocking at your door With something inside of me  
Something inside of me  
Something inside of me  
And now I can't look back Oh, please don't cut me loose  
I know you think that I'm bullet-proof  
Can't you see that it's hurting me  
What do think I'm supposed to be When something inside of me  
Feels like I've been wanting you forever  
There'll never be another century  
There's no time to think about the weather When there's something inside of me  
Something inside of me  
Something inside of me  
And now I can't look back
