Panzer Battalion

Sabaton

Under this sun no shadows will fall
Piercing our eyes as we charge
An armoured battalion on course to the east
Closing the end of it's marchThis time we're here to finish a job
Started a decade ago

Driving the animals out of their holes
To bury them 6 feet below
Armoured tanks of mass destruction

armoured tanks of mass destruction

Killers in the east

Rats who dares to stand before us

Feel our guns go live[Chorus:]

Death in the shape of a panzer battalion

Insect of terror don't run face your fate like a

Man cannot outrun our panzer battalionThousands of tons of armour and guns

Making it's way through the sand

Our panzer battalion is back for revenge

Artillery sweeping the landFirst strike is ours no mercy is shown

There's rivers of blood in our track

Breaking their waves of defence with our tanks

Infantry watching our backBlow their SAM sites clear for air strike

Ready for the storm

Minefields swept there's no surrender

Feel our napalm burn[Chorus x2]Under this sun no shadows will fall

Piercing our eyes as we charge

An armoured battalion on course to the east

Has reached the end of it's marchArmoured tanks of mass destruction

Killers in the east

Rats who dares to stand before us
Feel our guns go livePanzer battalion
Insect of terror don't run face your fate like a man
Panzer battalion
