

# Political

## Baxter

It will take some time for me  
To get the point of what  
Was wrong with this  
I saw it was  
Too many cold  
Too many scared  
And bold and failed  
Turn on the lights  
And watch me run  
You will follow me to the end  
You will see  
I will take care of everything  
And I will make you better off  
I assure you  
And you won't even be around  
And you won't say a word to cope  
And I will ask the better ones  
How come you lie  
How come you ain't a part of us  
You will see  
And you will always watch for me  
You will see  
And you will always watch for me  
Turn on the lights  
And watch me run  
You will follow me to the end  
You will see And you will always watch for me  
I will take care of everything  
And I will make you better off  
I assure you  
You will see me You will see  
And you will always watch for me  
You will see me  
Turn on the lights  
And watch me run  
You will follow me to the end  
You will see  
I will take care of everything  
And I will make you better off

I assure you  
You will see  
You will see  
You will see  
You will see me.
