Nothing to Lose

Ten Foot Pole

As we ride up the mountain
I can hear the young ones brag
Just how much they drank last night
And all the little girls they've hadThere's nothing that I'd like more
Than to teach humility
I'll leave these little bastards in the trees
As we fly down the mountainI can tell it will be close
The new kids have that hungry look
My knees are feeling old
I can feel it getting squirrelly
As I push for a little speedI think about my Josephine
And the money that we need
Last year a friend of mine
Hit a little treeI keep on saying to myself
It's not gonna happen to me
He never walked the same again
How long till my luck runs out?No fear, no doubts
I never used to worry
About all the little things
That could go wrongNo fear no pain
I just have to ignore the brain
Ust go on pretending
I have nothing to loseThe hairpin turn
I see my chance
To slide right through the gap
One mistake, we'll all be gone
I never used to think of thatI hit the brakes and pull aside
I feel the new kids sneer
But if they're smart
They'll do the same thing
In a couple years
