Safely

Hot Rod Circuit

Smoke it down
Until you smell the flesh burning from your finger tips
Your knuckles are white
From beating on the walls at night
Cast your worries to the side
Focus only when you get the time
Gonna lose your mind
It happens all the timeMaybe I can tell you
To keep your head up and follow through
Good things will come to you
I could worry myself to death about you
Hope you get there safelyI got your letter that you sent to me
About your misery
A state of suffering
It's such a shame to see
Years of discretion and of a sound mind
A suicide is for the weaker kindMaybe I can tell you
To keep your head up and follow through
Good things will come to you
I could worry myself to death about you
Hope you get there safely
And your unhappiness
Emotional distress
And your unhappinessMaybe I can tell you
To keep your head up and follow through
Good things will come to you
I could worry myself to death about you
Hope you get there safely
And your unhappiness
Emotional distress
And your unhappiness
