

# Go On, Say It

## Blind Pilot

Picking up sound on the interstate  
I am my breath  
letting in waves. there will be time when the sleep I'm in  
covers me whole  
covers me thin I know I'll wake up old,  
forgetting which box this is in.  
How I will keep you,  
just how I left you. Our daughter once told me I know a lot  
now I'm strutting off with more than I've got  
A hitchhiker told me I don't talk a lot  
It made me feel fine,  
made me quiet. If you'd have said it right  
instead of painting words white...  
How I would keep you  
just how I left you.  
Come on say it right.
