World Keeps Spinning (a Chronic Future)

Chronic Future

Stationed in hollow basics, this world will never face it
We'll keep participating in community wide face lifts
To cover up our problems, one government won't solve them
I'm on this groove to soothe this wrinkled face of earth revolving
I passed an adequacy test actual fact is I'm impressed
At the pattern of people popping up to help us do the rest
These are not movie sets, these are physical streets
Becoming more tired every time history repeats
So now it seems that we've run out of time
The world keeps spinning on this fragile mind
Now it seems that we've run out of time
The world keeps spinning what you said
The world keeps spinning what you said
Well, I think they got it planned
How to ruin our lives turning truth into lies
We approve the disguise they're just moving our eyes
We just simply don't stand up for ourselves
Against the upper hand and pull out their plan
So now it seems that we've run out of time
The world keeps spinning on this fragile mind
Now it seems that we've run out of time
The world keeps spinning what you said
The world keeps spinning what you said
What you said, yeah, you will never know

Where are we going? I don't know anymore
Where are we going? I don't know anymore
I'll just continue to circle, why?
It's comfortable doing what's been done before
Where are we going? I don't know anymore
Where are we going? I don't know anymore
I'll just continue to circle, why?
It's comfortable doing what's been done before
We've ended before and started again
Made partners and friends
Parted with them then they wanted revenge
Bloodshed it startles our heads
While we lay curled up in our beds
Watching news report the dead

So regular to all our heads
That we ate up everything that they said
Now it seems that we've run out of time
The world keeps spinning on this fragile mind
Now it seems that we've run out of time
The world keeps spinning what you said
The world keeps spinning what you said
What you said, yeah, you will never know
