Oh Brilliance

Frente!

Hesitation's dangerous
You move while you taste dust
Life is coming for us
And love's had resistanceFlawless you are in the distance
Oh, Brilliance shall we dance
You love like your under cameras
Photography will damn usI think that you think that you're famous
If you're alive you just have to be fearless
Light me some serious steps
To burn in this meaninglessnessWe'd just return
But our lives just repaid us
Is it all we can be just to be us
And no one uncovers anyOriginal sincerity
We just dance with our history
A pity what it should be
Here comes the silence to kill meYesterday, I noticed I love you
I'm holding my life like a weapon above you
I have no more words, I've spent them
If we wanna dance, we'll have to invent themAre we stuffing the nothing with this?
Sometimes we dream we're imagining it it
All that is real is the spin and the swing of the sea
