

Dictatorsaurus

Probot

All set, systems on and ready
Move forward, level reads okay
Click, drive, prepare to break away
One target, today is D-day
Soaked in lies and fears after all these years
When the sun will rise, the monster's gonna die
From now on, things are gonna change
'Coz we know why and how who you really are
From now on, things won't be the same
'Coz we know what you're doing and we know
Where you're hiding, we know everything
Next step, engage all procedures
Code, enter, signal loud and clear
Star-shell sparkling high in the sky
All together we'll make this dream come true
