

# When You Fall In Love

Johnny Lee

They'll be a rainbow around the moon  
you'll fall apart when you hear that tune  
everyday will end too soon  
when you fall in love

you'll get weak in the knees when you see her smile  
you'll try your best to hide it cause its not your style  
you let it get you cry'in like a little child  
when you fall in love

Chorus

when you fall in love it gets outa your hands  
it gets into your heart, it changes your plans  
and you only understand, when you fall in love

the summer breeze will chill you to the bone  
you'll walk the floor till the break of dawn  
sometimes you'll feel so alone  
when you fall in love  
you wont notice but the day that it shows  
that light will follow you where ever you go  
thats how you'll know  
when you fall in love

repeat chorus 4 times

---
