

Guess

Officer!

By surprise the fragile fluids that were
Seem to disappear behind the eye in disguise
Or how it ought to really ought to be
Like crystal breaking in a spoon and it's too late
A finger bends another glass of fruit By surprise I finally see the problems in their eyes
Or how it ought to be really ought to be
Behind my eyes a different set of keys A figure A to B
Are you mean or do you mean goodbye? Are you clear, do you mean goodbye?
Then they say to you
Say it here, say it here A different time you stayed too soon
Or played before I even know
Say it here, say it here A candle shows the lack of what I need to see to be confused
But not to use a better friend than
You're his he finds he stayed too soon or played before I even knew
I guess it's just of business now, I guess Are you clear, do you mean goodbye?
When I say
Say it here, say it here Different time you stayed too soon
Or played before I even knew
Are you clear? Say it here
