

Force of Nature Comes Down

7th Order

"Force Of Nature Comes Down" - 7th Order

music/lyrics: Daniel Jones

2003-07@7th Order Songs, ASCAP

tornado blowing up a swirl in the sky
tidal wave nearly one mile high
mountain tops exploding and the lava will flow
so listen up, i got something you need to know
you better look alive, when the force of nature come down

earthquake shaking, under your feet
watch it making deep cracks in the street
she's an act of god, a real fireworks show
so listen up, i got something you need to know
whoa I know
you better look alive, when the force of nature come down

it's been that way since time began
deadliest power ever known to man
run while you able cause it's past time to go
so listen up, i got something you need to know
whoa I know
you better look alive, when the force of nature come down

it's coming down
down down
raining fire from the sky
talking, talking 'bout the force of nature
it's coming down down down
down on you
the force of nature
hey
coming down on you
coming down
