Visions

Razed in Black

Need a reason to be wrong
I need a reason to believe
Compassion for the choices made has dithered
It's time to let the senseless pass
Time to prick this psychopath
End this hang-man game of resolutionYou said that it was just for now
The wait is far too long
Why can't we bring things back
Just like they were beforeAs days go by, I wonder
Which thoughts collide about me
It's time to face the consequence
Time to see this through
Terminate the silence that you're bound toYou said that it was just for now
The wait is far too long
Why can't we bring things back
Just like they were beforeVisions of our past
