

Let's All Make a Bomb (New Version)

Heaven 17

And as the low aggress the high
All you can do is sit and cry
You've only got yourself to blame Don't try to stop me; it's too late
My mind's made up; this job won't wait
There's nothing left for me to say Hey! There's no need to debate
It's time to designate your fate
Take the M out of M.A.D.
Let's all make a bomb Take one hundred scientists or more
Place in a room and lock the door
Let them confer for half their lives Unlock the door; go in and see
What they have made for you and me
A brand new toy to idolize (chorus) Although the war has just begun
Ignore the sirens; let's have fun
Put on your best; go out in style Although our future's looking black
We'll go downtown and join the pack
Let's celebrate and vapourize
