State Unknown

Cipher System

I purify, I cleanse myself through chaos and my soul runs cold
I purify, I cleanse myself through chaos and my body breaks down
I sustain, I cleanse myself and I remain but not the same
Even stronger that it once appeared
Also weaker I realizeElectric meanings screamed, all at once, all at me nourishing on my reactions
Mechanical lies spoken, great great lies told to us, powerless without our trustAm I sacred, am I holy, the face I fear is my own
The doctors words: state unknownIncorrect growing, actual birth, speeding upMe, myself, my framework collapsed inside
Under the withering surface there's nothing left to see
Nothing left to seek, nothing left at all
So you leave me aloneElectric meanings screamed, all at once, all at me nourishing on my reactions
Mechanical lies spoken, great great lies told to us, powerless without our trustAm I sacred, am I holy, the face I fear is my own
The doctors words: state unknown
