

Stand Up

Trapt

Why don't you let me be
Leave me alone?
You start a fire inside
That I could never control
You wanna see a reaction
Come on and cut me down
You've gone as far as I'll go
Now you're crossing the line
And I am letting you know
Well, here's your reaction
Stand up, I have had enough
Walk away before I finish what you started
Face to face, I will put you in your place
End this game before I finish what you started
Face to face, everything will change
You planted the seed
How my anger has grown
Got a feeling inside
That I can't seem to control
You wanna see a reaction
Come on and cut me down
You've gone as far as I'll go
Now you're crossing the line
And I am letting you know
Well, here's your reaction
Stand up, I have had enough
Walk away before I finish what you started
Face to face, I will put you in your place
End this game before I finish what you started
Face to face, everything will change
Insult after insult after insult
After insult after insult
After insult after insult after insult
After insult after insult
Stand up, I have had enough
Walk away before I finish what you started
Face to face, I will put you in your place
End this game before I finish what you started
Face to face, everything will change

Walk away, everything will change
End this game
You wanna see a reaction
You wanna see a reaction
Well, stand up
