

Peach

Ten Feet Deep

Advisory - the following lyrics contain explicit language:

After you left where did you go?
'Cause all of us here, we wanted to know
What were you doing that would justify ruining
this thing that we've had going for so long?Ohhh we got lives and we're gonna use them
And we got eyes, we use to see
We got hearts and we're gonna bruise them
If it gets what we think we're gonna needWhile you were here, we had a ball
would never expect a stranger would call
And now you've got to meet someone
(She claims her name is Peach)
Under the false pretense you two have never metShe's so damn important
When she pulls you out the door
Another thing you oughta do now but you can'tOhhh we got lives and we're gonna use them
And we got eyes, we use to see
We got hearts and we're gonna bruise them
If it gets us where we think we need to beWhat were you doing that could justify ruining
This thing that we've had going for so long?Ohhh we got lives and we're gonna use them
And we got eyes we use to see
We got hearts and we're gonna bruise them
If it gets us where we think we need
Gets us where we think we need
Gets us where we think we need to be
