

# I Love You Always

## The Icarus Account

There were things when we first met that I knew  
That I would never forget about you  
The way you laughed harder than I'd ever seen  
Like the very first flower of spring You had me singing for days and days  
Only dreaming of ways and ways to say Tell me once tell me twice tell me all the time  
We're in love like the love that's in our favorite songs  
And I'm feeling like there's more than just a feeling when you say  
I love you always We were something special from the start  
A perfect pair made of imperfect parts  
And even when our fights come in between  
I love you means I'm always yours to keep And we'll be singing for days and days  
Only dreaming of ways and ways to say Tell me once tell me twice tell me all the time  
We're in love like the love that's in our favorite songs  
And I'm feeling like there's more than just a feeling when you say  
I love you always When you when you when you say  
I love I love you always  
You got me feeling like there's more than just a feeling when you  
You got me feeling like there's more than just a feeling when you And we'll be singing for days and days  
Only dreaming of ways and ways  
We'll be singing for days and days and days Tell me once tell me twice tell me all the time  
We're in love like the love that's in our favorite songs  
And I'm feeling like there's more than just a feeling when you say  
I love you always
