

# Good Times Are Now

Roger Taylor

Across the street your smile broke  
Like a wave upon my face  
You didn't notice me at all  
Across the street I saw you  
With some other pretty face  
I loved you then I love you now  
I loved you then I love you now  
I had to take a chance  
'Cause special moments only tend  
To happen now and then  
I had to take my chance and  
Grab the moment by its ears  
Not be just some fly on your wall  
Had to take my chance there  
So I asked you out to dance there  
I loved you then I love you now  
I loved you then I love you now  
I had to take a chance  
'cause special moments only tend  
To happen now and then  
Live for the present  
It's the only one we have  
Nobody gets out of here... Alive  
Life in the future might never come to pass  
You know; the good times are now
