

# Waiting for the Stars (feat. David Shaw)

## Vitalic

Should we ride along  
We make it sound so easy  
Got something to hide why  
Things are different now  
We want to have it all  
Should we find it easy  
Can't escape the need to know What the future holds  
Waiting for the stars to align  
Waiting for the stars to align  
Waiting for the stars to align  
Waiting for the stars to align Looking over my shoulder  
This is really new to me  
Try to picture what's coming  
Maybe I don't want this to be  
It's feeling much closer  
Even if I'm afraid to see  
Can't escape the need to know  
What the future holds Waiting for the stars to align  
Waiting for the stars to align  
Waiting for the stars to align  
Waiting for the stars to align  
Waiting for the stars to align  
Waiting for the stars to align
