

# Phucked Up Phreak

## Velvet Acid Christ

Murder the feelings all left aside  
From all those days that you try to hide  
You lift out the anger and cut it dry  
You soak your tears away, now you can fry  
Your mind melts away, you go with the flow  
You hold it down, but you can't let go  
You try to speak, but you hear no sound  
Lying on the ground, expressed into sanity  
Where you will never be  
Cuz we're all dead, Cuz you're all dead (4x)  
We walk into the night  
We cut off the right  
We won't feel a thing  
We're so insane  
Disturbed thoughts distort your mind  
You're penetrated, obliterated  
We all face it, We all try to hide  
The unrelying, The lie  
The feelings, the how, the when, the why  
We always lie, we always lie  
We always cry, we always die - you  
Push away the feelings left, so far away  
We walked into the sun  
And we left our hopes astray  
We hope to live another day  
But when you break it all down  
There's really nothing left to say (3x)  
So babble away...(2x)
