Module Overload

Fu Manchu

Right by a satellite
We went out of control
A hundred feet in front of me
Back up we goA week's like a time spent leaving it alone
Ya can't get there from here
I heard 'em say
Up from where we wereAnd I'm sure, been there before
And I'm sure, been there before
And I'm sure, been there before
And I'm sureCutting through the field like a sea
Head beneath it all
Hands off the wheels, start the ride
Heading to the wallHypnotize from the light
Nothing like we seen
Can you show us the way?
Light the fee, holding what we needAnd I'm sure, been there before
And I'm sure, been there before
And I'm sure, been there before
And I'm sureIt's a module overload
It's a module overload
It's a module overload
It's a module
